3	Phnom Penh- Sihanoukville Expressway Project (formerly Phnom Penh-Sihanoukville Highway Corridor Improvements)	Roads and bridges	This is an approximately 191 km expressway project to be built on a new alignment. A build- operate- transfer (BOT) model with a 50-years concession period was approved. The expressway will provide a high- capacity road link between Phnom Penh and the port city of Sihanoukville, and to the Greater Mekong Subregion (GMS) Southern Coastal Corridor.	2016	1,600.0	1,900.0	People's Republic of China (PRC) Private sector—1,600.0	People's Republic of China (PRC) Private sector—1,900.00	Ongoing. The Concession Agreement was signed in January 2018. Land Acquisition and Resettlement is ongoing, Construction is expected to start at the end of 2018 and completed at the end of 2022.	Link between Capital City of Phnom Penh to Deep sea port of Sihanoukville. It is also a part of the Southern Central Corridor.	191 km expressway built	Mr. SUON Sophal Office of GMS National Coordinator, Cambodia sophalsuon@ gmail.com
4	Link road between NR5 and NR6 near Kampong Tralach, north of Phnom Penh	Roads and bridges	The proposed new 21km road, including 1km bridge across Tonle Sap Lake, will shorten the distance between NR5 and NR6 from 64 km to 22km. The link will facilitate the movement of traffic between these major highways north of Phonom Penh and will reduce traffic congestion within Phnom Penh.	2019	60.0	60.0	TBD	TBD	Proposed. Seeking funding No Progress	Kampong Tralach District SEC	21 km road and bridge constructed	Mr. SUON Sophal Office of GMS National Coordinator, Cambodia sophalsuon@ gmail.com
5	Railway access to the new Phnom Penh Port (53 km)	Rail	This project is expected to provide the following benefits: (i) connecting two international ports, (ii) enhancing multimodal transport, (iii) reducing road accidents and traffic congestion, and (iv) reducing the cost and time of mass transit modes for containers.	TBD	200.0	200.0	TBD	TBD	Proposed. Seeking funding No Progress	SEC	53 km railway constructed	Mr. SUON Sophal Office of GMS National Coordinator, Cambodia sophalsuon@ gmail.com

17	Jinghong-Daluo Expressway	Roads and bridges	The project is an important part of the north–south corridor (Kunming–Daluo–Tachilek–Chiang Rai), and has already been incorporated into the PRC's Planning for the National Expressway Network (G8512), including a total length of 101.56 km; 4 lanes; and the border control point at Menghai, the PRC. The existing road along the corridor links Daluo, the PRC; northern Myanmar; Tachilek, Myanmar; and Chiang Rai, Thailand. However, the road is in poor condition and in need of a renovation. The construction of a new road will improve transport connectivity among the PRC, Myanmar, and Thailand; and will boost the development of the economy, trade, tourism, etc. Meanwhile, the completed corridor will serve as a strong complement to the Kunming–Bangkok Highway, and will provide more options for the movement of people and cargo within the region.	2016	2,388.0	2,388.0	Government of PRC	Government of PRC	Proposed Planning for this project has already been completed under PRC's Planning for the National Expressway Network (G8512). However, it has not yet been included in the thirteenth Five-Year Plan. Implementation has not started yet.	Kunming-Daluo- Tachilek-Chian Rai NSEC	See project description. 70	The Construction of a New Railway Line from Baan Pai (KhonKaen) to Mahasarakham, Roi Et, Mukdahan, and Nakhon Phanom	Rail	In 1989, the Government of Thailand decided to improve the nationwide rail network. One important network expansion was the Bua Yai– Mukdahan–Nakhon Phanom line on the GMS EWEC. Circumstances later resulted in the need for a feasibility study on the construction of a new railway line that would be integrated into the EWEC. This new, updated study was significant because it represented one of the milestones of rail infrastructure expansion in the EWEC. The study showed that this proposed route should be built as a doubling track on the new alignment for the Baan Pai (Khon Kaen)– Mahasarakham–Roi Et–Mukdahan–Nakhon Phanom line. For the time being, the State Railway of Thailand is carrying out a detailed design study on the new route alignment, which will be able to link with the Thai–Lao Friendship Bridge No. 2, in Mukdahan, and the Thai– Lao Friendship Bridge No.3, in Nakhon Phanom.	2018	1,724.0	1,708.9	TBD	Government of Thailand —1,708.9	Proposed. 			500 kV line at \$1.5 million/ km and two 500 kV substations at \$50 million each. (Tentative routing: Mawlamyine–Thaton– Bago)									
	Demonstration of Second Generation Biofuel Technologies and Associated Biomass Value Chains	All GMS countries	This project will build pilot plants under a publicprivate partnership (PPP) that will aim to meet financial targets, successfully demonstrate feasible technologies, and create value chains. Upgrading biofuel technology will reduce conflicts over food security and will increase rural incomes through biomass value chains. The schedule will take into account the need for a careful consideration of technological issues and for the selection of private partners. Estimated cost is \$13.3 million per GMS member country.	2019	80.0	80.0	TBD	TBD	Proposed		See description

No. 7	Project Title Extension of Energy Access in Myanmar from Nodes in Thailand and in the People's Republic of China (PRC)	Coverage Myanmar	Description This project involves a grid extension from Myanmar's borders with the PRC and Thailand using generation plants in those two countries, based on the regional experience in grid extension in Cambodia, the Lao PDR, and VietNam. Ideally, such a project would build on the successful build-operate-transfer (BOT) model of the transmission project in Cambodia. The costs will depend on the number of distribution facilities and household connections in the chosen areas. It is likely that there will be few or no distribution facilities, in which case the costs will be much higher, closer to those for a conventional renewable energy project. The schedule will allow for the negotiating process under the BOT model. Estimated cost breakdown: \$10.0 million for the connection to a local isolated grid; and \$60.0 million if the distribution and connection are to be	2019	70.0	70.0	Original TBD	Updates TBD	Status Updates Proposed	Alignment	Outputs See description	Project Contact FERD, MPI Myanmar ferdsection@gmail. com

1	Harmonizing GMS Power Systems to Facilitate Regional Power Trade (formerly Support to RPTCC in the Completion of Performance Standards, Grid Codes, Market Rules, and Subregional Transmission Expansion Plan)	All GMS countries	The technical assistance (TA) supports the development of a clear basis for regional market rules that would comprise agreed rules and indicative planning of interconnections. It will result in a more functional regional market with genuine exchanges of electricity, leading to an improved reliability and quality of power supply and lower costs. A supplementary TA project was approved in 2017, the outcome of which will be a set of GMS performance standards and grid codes, and an enhanced regulatory framework. Additional output, among others, include feasibility studies for four new interconnection projects.	2014	3.5	3.0	ADB—2.5 PRC trust Fund—0.5 [Agence Française de Développement (AFD)—0.5]	ADB—2.5 PRC trust Fund—0.5	Ongoing		Regional Power Coordinating Center (RPCC) established and operations commenced through continued support to Regional Power Trade Coordsination Committee (RPTCC). GMS performance standards and grid codes considered for implementation by the Working Group on Performance Standards and Grid Code (WGPG). Guidelines for GMS regulatory framework proposed by the Working Group on Regulatory Issues (WGRI)	Bui, Duy-Thanh Southeast Asia Department (SERD) Energy Division, SERD
2	Ensuring Sustainability of Greater Mekong Subregion Regional Power Development (Phase 2)	All GMS countries	The TA will support the efforts of the Regional Power Trade Coordination Committee to forge agreements among the GMS countries on the technical, institutional, and operational aspects of the GMS regional power market, and ensure that these comply with environmental sustainability requirements.	2016	1.0	1.0	AFD—1.0	AFD—1.0	Ongoing

6	Proposing Models on Rational Utilization of Natural Capital in Biodiversity Corridors in Greater Mekong Subregion	Viet Nam	Biodivesity corridors have typical functions as an increase in local populations through connectivity between the populations, spaces for animals and plants movement, social functions: recreation, aesthetic function, community and cultural connectivity. Projects on biodiversity corridors were managed by ADB to develop biodiversity corridors in Cambodia, Laos, Thailand, China, Viet Nam during 2006 – 2016. The projects got some results however challenges have been facing as planning and constructing hydrological power plants, agricultural cultivation, mining, enhancing roads, developing recreation and resident areas affect directly ecosystems, biodiveristy, water resources and people life in the region. Therefore, it is important for defining models on rational utilization of natural capital in biodiversity corridors. The models must undertake basic functions of biodiversity corridor because in order to develop successfully the corridor, the people livelihood must be sure.	2019		1.3		Grants	Proposed by Viet Nam		Review of results and disadvantages of the projects on biodiversity corridors, Re-defining biodiversity corridors based on the method of a GIS weighted-distance and least-cost, Survey of models on utilization of natural capital in some selected communes belonging to the defined biodiversity corridors, Implementing some models in practice, Developing criteria to assess effects of the models, Assessment of economic, social, and environmental effects of the models, and Propose models on rational utilization of natural capital for the biodiversity corridors. Pro 1	strengthening Resilience to Climate Change in the Health Sector in the Greater Mekong Subregion	O22 Cambodia, Lao PDR, Viet Nam	This regional capacity development technical assistance (TA) will work with regional academic and research institutions, as well as with public health and environmental authorities, to build the scientific knowledge needed to address the health impact of climate change and quantify the additional burden of affected health outcomes. It will support workforce development by training a new generation of competent and experienced public health staff to respond to the threats posed by climate change and incorporate mainstream climate concerns into health policies and programs. It will increase awareness in the public and private sectors of the significance of climate change, and identify potential publicprivate partnerships (PPPs) for the implementation of adaptation measures, such as climate-proof infrastructure.	2015	4.5	4.41	ADB-4.4 Governments of Cambodia, Lao PDR and Viet Nam-0.1	Nordic Development Fund —4.36 Governments of Cambodia, Lao PDR, and Viet Nam —0.05	Ongoing. Consulting firm was engaged to implement TA activities. National workshops and procurement of small-scale equipment, TOTs, training on IS-EWS, Climate Change and Human Health have been conducted in all 3 countries	Nationwide	Output 1: Knowledge and understanding of relationship between climate change and human health improved. Output 2: Human resource skills in coping with climate change adaptation in the health sector strengthened. Output 3: Knowledge products shared and advocacy promoted.	Ye Xu, Southeast Asia Department, ADB
2	Malaria and Communicable Diseases Control in the GMS	Cambodia, Lao PDR, Myanmar	This regional capacity development TA is expected to fill policy gaps by (i) targeting vulnerable groups, in particular MMPs; (ii) strengthening diagnostic and treatment capacity in remote districts; (iii) improving disease surveillance and rapid response to epidemics; and (iv) involving the private sector in the delivery of health services targeting vulnerable groups.	2015	4.5	4.5	Trust Fund under Health Financing Partnership Facility—4.5	Trust Fund under Health Financing Partnership Facility—4.5	Completed on 25 June 2018. TA Completion Report being drafted		Output 1: malaria diagnostic capacities and training of relevant health staff in 2 regions and 5 townships in Myanmar. Output 2: field-based activities in selected CLM districts done to assess MMPs malaria risks and develop pilot models.	Gerard Servais Sr Health Specialist SEHS, SERD gservais@adb. org

7	Poverty Reduction through Safe Migration, Skills Development and Enhanced Job Placement in Cambodia, Lao People's Democratic Republic and Thailand (PROMISE)	Cambodia, Lao PDR, Myanmar, Thailand	PROMISE is a new regional program led by the IOM that will strengthen the linkages between labor migration to Thailand and efforts to reduce poverty in the region, with a particular focus on engaging employers and training institutions in skill development, facilitating ethical recruitment and protection, and improving the safety of migration and the access of migrant workers to decent employment opportunities. PROMISE will establish partnerships between employers in Thailand and skill-development partners based in Cambodia, the Lao PDR, Myanmar, and Thailand to develop market-driven and migrant-centered skills training, and promote ethical recruitment models that will improve the protection and employability of migrants. PROMISE will also facilitate greater cross-border exchanges, as well as bilateral and subregional collaboration on skill development and certification. In addition, the return and reintegration component will broaden the opportunities for returning migrants to utilize their skills and invest their social and financial capital productively upon their return. PROMISE will also build the capacity of migrant support services in Cambodia, the Lao PDR, and Myanmar to provide reintegration services and enhance the linkages of these services with employment offices, skills certification authorities, financial institutions, and professional associations. Finally, PROMISE willwork to support migrant-protection frameworks at the national and subregional levels, engaging in policy development and capacity building of governments	2017	8.3	8.3	Swiss Agency for Development and Cooperation (SDC), International Organization for Migration (IOM)	Swiss Agency for Development and Cooperation (SDC), International Organization for Migration (IOM)	Ongoing PROMISE completes first year of implementation by end August 2018. Progress achieved includes awareness-building and mobilization of manufacturing and hospitality employers in Thailand on migrant worker skills development and rights protection; operationalizing cross-border skills development schemes between training providers, implementing on-the-job trainings and workplace orientation for newcomers; consultations on development of regional soft skills guidelines for migrant worker skills development; improving skills circulation and validation upon return through job-matching services, improving the capacities of Migrant Resource Centres		Migrant workers provided training and information through Migrant Resource Centers on safe migration and soft skills; pre-departure/ post-arrival/ re-integration orientation; upskilling; and entrepreneurship. Migrant workers assisted on job placement, job matching; participate in job fairs, and join migrant networks. Employers and recruitment agencies understand business case and commit to ethical recruitment and skills development of migrant workers. Policy development for mainstreaming migration through national development plans; enhanced regional dialogue and bilateral cooperation on	Ms. Anna Platonova, IOM Thailand aplatonova@ iom.int

1	Corridor Towns Development Project II	Cambodia, Lao PDR, Viet Nam	The Second Greater Mekong Subregion (GMS) Corridor Towns Development Project is being implemented in seven towns in Cambodia, the Lao People's Democratic Republic (Lao PDR), and Viet Nam. The project has been in operation since 2016 and is slated to end in 2021. It includes livelihood support, development of climate resilience, and institutional capacity building in public investment management. The expected impact of the project will be the transformation of the towns into centers of activity in the GMS economic corridors. The outcome will be improved urban infrastructure that supports economic linkages, strengthens the green-growth potential of participating GMS towns and corridors, and enhances the climate resilience of those towns and corridors. The breakdown of the estimated costs in terms of millions of dollars is as follows: Country Total ADB Govt. Cofinancing Cambodia 38.1 33.0 5.1 0.0 Lao PDR 52.0 37.0 5.0 10.0 Viet Nam 121.7 100.0 21.7 0.0 TOTAL 211.8 170.0 31.8 10.0	2015	211.8	211.8	Asian Development Bank (ADB)—170.0 Governments of Cambodia, the Lao PDR, and Viet Nam —31.8 Association of Southeast Asian Nations (ASEAN) Infrastructure Fund —10.0	Asian Development Bank (ADB)—170.0 Governments of Cambodia, the Lao PDR, and Viet Nam—31.8 Association of Southeast Asian Nations (ASEAN) Infrastructure Fund—10.0	Approved in 2015 and made effective in 2016 Cambodia: Comprises of four subprojects: (i) Kampot Wastewater Collection and Treatment and Urban Drainage, (ii) Kampot Solid Waste Landfill, (iii) Sihanoukville Urban Drainage and (iv) Sihanoukville Solid Waste Landfill. Contract awards are anticipated by December 2018 for two of the subprojects (Kampot WWTP and Urban Drainage and Sihanoukville Urban Drainage). Detailed designs for the Kampot and Sihanoukville landfill subprojects have not commenced. It is expected that the designs will be finalised in Q1, 2019 with contract award in Q2 2019. 5	Ruili Border Economic Zone Infrastructure Development Project	PRC	The proposed project will support the development of infrastructure and public services on the Chinese side of the Ruil–Muse Border Economic Zone (shared with Myanmar). The objectives are to facilitate the flow of goods, people, and investment capital, and to provide better public services to local residents. Outputs will include (i) building four schools (a kindergarten, elementary, middle, and high school); and (ii) improving the infrastructure of the Ruili International Logistics Park, which has a total area of 239.2 ha. In terms of linkages with national and/or regional strategies, the Ruili–Muse Border Economic Zone is a critical node on the GMS NSEC and on the western branch of the Pan-Asia Railway Network; it is also one of the border economic zones supported by the Chinese government.	2018	627.8	627.8	To be determined (TBD)	TBD	Proposed.

4	Research on China– Indochina Peninsula Economic Corridor Transportation and Business Planning	GMS countries	Beginning in Nanning, the Chinalindochina Peninsula Economic Corridor passes through seven countries (PRC, Viet Nam, Lao PDR, Cambodia, Thailand, Malaysia, and Singapore). The corridor could impact Myanmar via its connection to the GMS East–West Economic Corridor (EWEC). Although the corridor has transportation capacity, the associated infrastructure is not good enough, and economic development there is still insufficient. The proposed project aims to study the status of the corridor's transportation infrastructure and to propose key projects to address any challenges. The research will also generate suggestions regarding the planning of the business environment and the change from a transportation corridor into an economic corridor.	TBD	4.2	4.2	TBD	TBD	Proposed	EWEC		Mr. LI Rui Office of the GMS National Coordinator, PRC Iiruimof@139.com

6	Training and Technical Assistance for Implementing Cross- Border Economic Zone between Myanmar and the PRC	Myanmar, PRC	The ministries of commerce of Myanmar and the PRC signed a memorandum of understanding (MOU) on the establishment of the Myanmar–PRC Border Economic Cooperation Zone. To carry out the responsibilities mentioned in the MOU, Myanmar needs to set up a joint working group composed of competent government officials. Myanmar should recruit these officials from line ministries, and train them to be able to formulate a master development plan, design a structure for cross-border administration, create an investor-friendly business environment, and enhance private–public partnerships (PPPs). Toaccomplish this, Myanmar needs to design a 3-month training course that would include course work and field trips to SEZs in Cambodia; Hong Kong, China; Japan; and the Lao PDR. It is proposed that 20 officials undergothis training.	2018	0.2	0.2	ADB	ADB	Proposed by Myanmar	NSEC	Myanmar officials trained in setting up and implementing cross border economic zone between Myanmar and PRC	FERD, MPI ferdsection@ gmail.com

3	Enhancing Capacity of Sanitary and Phytosanitary (SPS) Arrangement to Facilitate Trade in Myanmar	Myanmar	The project is proposed to support relevant SPS agencies, trade regulatory and promoting bodies, as well as relevant private sector stakeholders to enhance their full spectrum of SPS capabilities, and thus promoting increased trade in Myanmar. It will cover the following preliminary scope: 1. Strengthening SPS governance: The project will facilitate a coordination platform among relevant SPS agencies and the trade bodies with the private sector to ensure effective coordination and efficient delivery of required SPS services. 2. Enhancing SPS capability: The project will support upgrading of (a) SPS testing labs and capabilities; (b) relevant IT-based systems to facilitate SPS processing (including improved procedures); and (c) improved surveillance capability to manage market access requirements and outbreak control. 3. Improving SPS trade-enabling functions: The project will enhance the government's capacity in managing SPS market access requirements in concluded and negotiating trade agreements and engage with private sector stakeholders to build their compliance capability to ensure positive impact on trade flows from the improved SPS capability.	2020		25.0		ADB—24.0 Government of Myanmar—1.0 (in kind, TBC) Co-financing— TBC	Proposed			ADB Myanmar

33		Support for Implementing the Action Plan onTransport andTrade Facilitation inthe GMS (Subproject 2)	All GMS countries	The cluster regional policy advisory TA supports the implementation of the GMS Trade and Transport Facilitation Action Plan, which was endorsed by the 16th GMS Ministerial Conference, in August 2010 in Ha Noi. The TA has the following expected outputs under three components: (i) under transport facilitation, an exchange of traffic rights; (ii) under trade facilitation, (a) coordinated border management, (b) an enhanced SPS regime, (c) strengthened national and subregional transport and trade facilitation (TTF) institutions, and (d) a regional trade logistics strategy; (iii) under capacity building and regulatory reform: (a) capacity development, and (b) legal and regulatory improvements and harmonization. The TA is being implemented through a cluster approach, with Subproject 1 (\$2 million) implemented from 2011 to 2013, and Subproject 2 (\$3.7 million) from 2014 to 2017. The cluster approach was adopted to (i) acquire the flexibility needed for successful TTF outcomes, and (ii) allow a fine-tuning of activities based on the outcomes of previous efforts and the evolving context of TTF initiatives, as the GMS countries implement the ASEAN Economic Community Blueprint.	2014	3.7	3.7	Department of Foreign Affairs and Trade (Australia)— 3.7	Department of Foreign Affairs and Trade (Australia)— 3.7	Ongoing One of the major initiatives being supported by this RETA related to the advancement of the GMS Cross Border Transport Agreement, implementation of which was launched on 1 August 2018 following the signing of the MOU for its Early Harvest Implementation by all member countries as of March 2018 and its ratification in 2015. No. 4	Project Title ASEAN Economic Community Support Program, Technical Assistance	Coverage Cambodia, Lao PDR (2 of 8 ASEAN countries covered)	Description The AEC Support Program Facility will assist countries in formulating and implementing national reform programs designed to meet their AEC commitments. This TA will help prepare the AEC Support Program for Cambodia and Lao PDR, among others.	2016	Original	5.0	Original ADB	ADB—5.0	Ongoing Country coverage was expanded to 8 ASEAN Countries which includes Cambodia and Lao PDR.	Alignment	1. Action plans and/or roadmaps to participate in the AEC prepared 2. Capacity to implement the AEC Commitments in priority areas developed 3. Monitoring and Evaluation of AEC implementation at the country level strengthened	Project Contact Maria Cristina Lozano Astray, Asian Development Bank
5	Strengthening Capacity Building for Logistics for Small and Medium Enterprises along GMS Corridors	PRC, Viet Nam	As a driving force of economic corridor development, the SMEs, especially logistics SMEs, face many constraints and bottlenecks. Before transforming a transport corridor into a logistics corridor, the capacity of logistics SMEs should be addressed. As a starting point, training the logistics SMEs that are operated by minority ethnics could be a good way to support the inclusive growth agenda of the GMS. The train-the-trainers approach would be desirable for this TA, and logistics associations could play an important role.	TBD	TBD	TBD	TBD	TBD	Proposed			
6	Strengthening the Cooperation among Cambodia, Lao PDR, and Viet Nam in the Development Triangle Area	Cambodia, Lao PDR, Viet Nam	The TA will involve (i) an assessment of the potential of the Cambodia–Lao PDR–Viet Nam (CLV) Development Triangle; (ii) the facilitation of structured dialogues among the CLV countries, and between these countries and other stakeholders in the development triangle area, including potential investors and donors; (iii) an improvement of the capacity of joint	TBD	1.0	1.0	TBD	TBD	Proposed			
			coordination committees by providing selected sector and/orthematic studies with policy recommendations to the central and provincial governments.

1.	Broadband Development Strategies and Implementation Programs of the GMS	All GMS countries	The GMS member countries have many people living in remote rural areas (for example, 70% of the population in the Lao PDR), where there is typically no broadband internet access. But the government policies to meet rural demand are hindered by low returns on infrastructure investments. The project aims to survey and analyze the status of broadband development in the GMS member countries, identify problems and development needs, implement pilot spectrum frequencies (LTE 700MHz, TV White Space [TVWS], or other types of frequency bands), and develop broadband strategies for the GMS countries. An example of linkage between national and subregional plans: the ASEANICT Master Plan (AIM) 2015 and AIM 2020 (which will soon start implementation) and the Lao PDR country analysis report prepared under the Lao PDR-United Nations Partnership Framework	2018	8.0	8.0	Official Development Assistance (ODA)	ODA	Proposed

1	Broadband Development Strategies and Implementation Programs of the GMS	All GMS countries	Broadband is the cornerstone of national development. The United Nations defines its new broadband objective as "20 megabits per second (Mbps) access at \$20 per person by 2020."The technical assistance (TA) project will make recommendations to GMS governments and enterprises concerning their participation in broadband development. To this end, the project will analyze each country's national broadband development status, identify problems and development needs, establish GMS broadband development goals, and set major tasks and key construction projects. 2	Workshops on E-Commerce Cooperation and Exchanges in GMS	All GMS countries	The project involves a joint effort with related Chinese internet value-added enterprises (such as Alibaba) to conduct exchanges on e-commerce solutions and typical cases, with a view to implementing the MOU on the Joint Cooperation in Further Accelerating the Construction of the Information Superhighway and its Application in the GMS, promoting pilot programs involving electronic applications in cross-border and domestic projects of member countries, boosting e-commerce development in the GMS, and providing favorable conditions for those value- added enterprises to expand their presence in the GMS markets.	TBD	10.0	0.1	TBD	TBD	Proposed			
3	Cross-border International Interconnected Bandwidth Expansion Project	PRC, Lao PDR, Viet Nam	China Unicom signed a cooperation contract with Viettel, Vietnam Posts and Telecommunications Group (VNPT), FPT, HTC, and CMC, in Viet Nam; and Lao Telecom (LTC), Unitel, and ETL, in the Lao PDR, to extend the communication bandwidth across the border. The project will build a cable network encompassing Hong Kong, China, and the United States. An over 300-gigabyte bandwidth is expected to be available through 2018. 4	Workshop on international roaming for all operator/ regulator in GMS countries	Lao PDR, Cambodia, Myanmar, Thailand, Viet Nam	International roaming has become a global service of interest not only to tourists, but to investors and businesses, as well. Therefore, the techniques of negotiating interconnections and international roaming charges will be discussed by experts in the proposed workshop, which would be open to operators and regulators from the GMS countries. The project's outputs will include: (i) technical skill training given to operators and regulators attelecom companies and internet service providers in MOK countries, (ii) exchanges of ideas and experiences about international roaming, (iii) linkages between national and subregional strategies, and (iv) improved technical knowledge in the public and private sectors. 5	Training in Quality of Experience (QoE) in Voice/Data Services over Communication Network Monitoring	Cambodia, Lao PDR, Myanmar, Thailand, Viet Nam	The quality of experience (QoE) associated with voice and data services is very important for measuring the efficiency of networks and the users' level of satisfaction. For this reason, it is important to have the capacity to monitor network performance and understand user perspectives. The project's outputs will include: (i) training in technical skills given to relevant personnel in MOK countries, (ii) exchanges of ideas and experiences regarding the QoE with voice and data services, (iii) linkages between national and subregional strategies, and improved technical knowledge in the government and private sectors. Regional Investment Framework 2022: First Progress Report and Update

The Regional Investment Framework 2022 (RIF 2022) is the medium-term pipeline of priority investment and technical assistance projects in the Greater Mekong Subregion (GMS) and operationalizes the strategic thrusts and priorities of the GMS Program under the GMS Strategic Framework (2012-2022) and the Ha Noi Action Plan 2018-2022. The RIF 2022 was endorsed at the 22nd GMS Ministerial Conference in Ha Noi, Viet Nam on 20 September 2017 and then adopted by the GMS Leaders during the 6th GMS Summit of Leaders on 31 March 2018 in Ha Noi including the direction to ensure that the RIF is reviewed and updated regularly to adapt to changing conditions and priorities.

This RIF 2022 First Progress Report and Update represents updates to the RIF 2022 during the 2018 cycle (from February to November 2018). It includes a revision to the RIF 2022 to a new total of 247 investment and technical assistance projects requiring a total of \$80.9 billion in financing.

About the Greater Mekong Subregion Economic Cooperation Program

The Greater Mekong Subregion (GMS) is made up of Cambodia, the Lao People's Democratic Republic, Myanmar, the People's Republic of China (specifically Yunnan Province and Guangxi Zhuang Autonomous Region), Thailand, and Viet Nam. In 1992, with assistance from the Asian Development Bank and building on their shared histories and cultures, the six countries of the GMS launched a program of subregional economic cooperation—the GMS Program—to enhance their economic relations. The Program currently covers the following priority sectors: agriculture; energy; environment; health and other human resource development; information and communication technology; tourism; transport; transport and trade facilitation; and urban development, border economic zones, and other multisector.

About the Asian Development Bank

ADB is committed to achieving a prosperous, inclusive, resilient, and sustainable Asia and the Pacific, while sustaining its efforts to eradicate extreme poverty. Established in 1966, it is owned by 68 members—49 from the region. Its main instruments for helping its developing member countries are policy dialogue, loans, equity investments, guarantees, grants, and technical assistance.
