

Operationalizing One Health in the GMS Green Recovery

One Health & the Green Recovery

- COVID-19 has had huge economic impact on region
- GMS remains a hotspot for new emerging diseases & zoonoses
- Vulnerable to effects of climate change, pollution & biodiversity loss
- Good existing/emerging/re-emerging One Health coordination & planning
- Opportunity to use One Health to make the recovery more sustainable

Why is ADB involved?

- One Health features prominently throughout the GMS 2030 Economic Framework
- One Health provides an opportunity build on the existing GMS cross-sectoral One Health approaches and successes
- Need now to operationalize these efforts more effectively
- ADB is working on One Health across its geographical departments and its sector/thematic support: Health, Agriculture and Natural Resources, Environment and Climate Change
- This meeting provide an opportunity to discuss how to take the next steps to achieve One Health activities supported by the coordination mechanisms that exist and are emerging or re-emerging in the GMS
